INTRODUCTION

Basic population and housing data from the 1951 Census have been released, by Census Tracts, in a series of reports prepared in the Population Section of the Census Division.

This report presents basic data from the Retail and Services components of the 1951 Census of Distribution. It gives statistics, by Census Tracts for 14 of the larger Canadian cities, extending in some cases into the metropolitan fringe parts. The total number of establishments and total sales or receipts have been shown for each Census Tract, and wherever possible, by major groups of business. Considerable care has been exercised to avoid disclosure of individual firm's operations on this fine breakdown, and it has been necessary to withhold sales and receipts figures in numerous instances. However, the number of establishments has been shown in all cases.

These Census Tracts were established in coperation with local authorities for cities requesting this type of information. Wherever possible, local census tract committees were formed to delineate these areas.

Appendices

Appendix A. Remainder of metropolitan areas.

Appendix B. Index maps of census tracts.

Symbols used:

- Indicates NIL.
- Indicates figures withheld to avoid disclosure of individual operations, but these are included in the totals.

PREPARED IN THE INDUSTRY AND MERCHANDISING DIVISION

INTRODUCTION

Les données fondamentales sur la population et l'habitation tirées du recensement de 1951 ont été publiées, par secteur de recensement, en une série de rapports préparés à la Section de la population de la Division du recensement.

Le présent rapport contient des données fondamentales sur le commerce de détail et sur les services, recensés lors du recensement de la distribution en 1951. Les statistiques sont données, par secteur de recensement, pour 14 grandes villes canadiennes, qui embrassent, dans certains cas, la périphérie métropolitaine. Le nombre d'établissements de même que les ventes ou recettes totales sont indiqués pour chaque secteur de recensement et, là où la chose est possible, par groupes importants de commerces. Dans cette décomposition des chiffres, on a veillé particulièrement à ne pas divulguer les opérations d'une maison en particulier: dans nombre de cas, il a fallu, à cette fin, retenir les chiffres des ventes et des recettes. Dans tous les cas, toutefois, le nombre d'établissements est donné.

Les secteurs de recensement ont été délimités en collaboration avec les autorités locales, dans le cas des villes exigeant ce genre de renseignements. Partout où on a pu le faire, des comités locaux sur les secteurs de recensement ont été créés qui ont été charés de délimiter ces secteurs.

Appendices

Appendice A. Reste des zones métropolitaines.

Appendice B. Cartes-index des secteurs de recensement.

Signes conventionnels:

- Indique NIL.
- Indique les chiffres retenus afin de ne pas dévoiler les opérations individuelles, mais ces derniers sont inclus dans les totaux.
